/amaury-dufrenot
/Amorizz

SKILLS

Network & Infrastructure
TCP/IP, Routing & Switching (OSPF, VLAN, STP), Linux Administration (Debian, Ubuntu), Cisco Packet Tracer, Wireshark, DNS, DHCP, HTTP/S, SSH, MPLS, BGP

Cybersecurity
Penetration Testing Fundamentals, OSINT, Kali Linux, Metasploit, Burp Suite, Nmap

Development & DevOps
Python, TypeScript / JavaScript, Next.js / React, PostgreSQL / SQL, Git, CI/CD, Vercel, Java, Docker, Kubernetes

LANGUAGES

French	Native
English	Fluent (C1)
Spanish	Intermediate (B1)
Chinese	Basic (A2)

CERTIFICATIONS

CCNA (Cisco Certified Network Associate)
Cisco — In Progress

American Dual Diploma
Dual Diploma Program — Obtained

Linguaskill, C1 and above
Cambridge — Obtained

Driving License (Permis B)
Prefecture — Obtained

INTERESTS

Music: drums (conservatory), guitar, piano
Sports: tennis (15 years competitive, ranked 15/4), weight training
Entrepreneurship
Travel & cultural discovery

PROFILE

Networks & Telecom engineering student at UTT. Founded and shipped a SaaS platform in production (250+ users, 3k daily impressions). Hands-on with Linux, TCP/IP, Docker, Python, and cybersecurity tools. Seeking a 6-month infrastructure internship starting summer 2026.

EXPERIENCE

Founder — Dec. 2025 – Present
Novad

City recommendation SaaS platform matching user profiles to 300+ destinations using vector-based scoring.

- Shipped a full-stack SaaS platform from idea to production, reaching 250+ users and ~5 signups/day within 2 months (Next.js, PostgreSQL, Vercel)
- Built a vector-based recommendation engine scoring 300+ cities against user profiles using Euclidean distance computation
- Grew organic traffic to 3,000+ daily impressions through a programmatic SEO engine generating 700+ structured content pages

Next.js · TypeScript · PostgreSQL · Vercel · SEO

Worker Internship — June 2024 – July 2024
Robert-Paysage

On-site team operations under tight deadlines. Awarded internship bonus for quality and reliability of work.

PROJECTS

Archive Server & Virtual Shell — Developer — Sept. 2024 – Jan. 2025

Implemented a TCP-based archive server handling LIST, GET, and PUT commands with sequential request queuing and operation logging via netcat. Developed a virtual shell client (vsh) enabling interactive archive navigation without extraction: ls, cd, cat, mkdir, rm with full path resolution. Designed a custom archive format with header-based metadata indexing for efficient random access to file contents.

Bash · Netcat · TCP · Linux · Shell Scripting · Client-Server

Translate Project — Developer — Jan. 2025 – Mar. 2025

Architected a multi-service pipeline with FastAPI backend exposing REST endpoints and Streamlit frontend for file management. Integrated three ML models in a single workflow: Whisper (speech-to-text), M2M100 (EN→FR translation), and Mistral 7B (subtitle refinement via llama.cpp). Built subtitle post-processing module for SRT cleanup, segment splitting, and AI-enhanced phrasing.

Python · FastAPI · Whisper · M2M100 · Mistral 7B · PyTorch

Hackable Security Labs — Developer — Sept. 2025 – Dec. 2025

Built isolated penetration testing environments using OpenVPN with full PKI certificate management (CA setup, certificate generation and distribution). Configured secure tunnel infrastructure with importable Docker images for reproducible lab deployment. Used for hands-on security training scenarios including network reconnaissance and vulnerability testing.

OpenVPN · PKI · Docker · Linux · Bash · Kali Linux

Play Tennis Everywhere — CTO & Co-founder — Aug. 2025 – Present

MVP in active development. Designing a real-time player matching platform with PostgreSQL database, Supabase backend (auth, storage, real-time subscriptions), and automated deployment via Vercel. Multi-criteria matching algorithm based on skill level, geolocation, and availability.

Next.js · TypeScript · Supabase · PostgreSQL · Vercel

Tiny Habits — Co-creator & Pitcher — Apr. 2025 – June 2025

Built a finance tracking app with drag-and-drop dashboard, per-category budget tracking, and OpenAI-powered transaction auto-categorization. Pitched to 50+ participants at Shanghai University and awarded Best Public Speaking and Outstanding Business Potential.

Next.js · TypeScript · Tailwind CSS · shadcn/ui · OpenAI API

EDUCATION

Engineering Degree, Networks & Telecommunications (in progress) — Sept. 2023 – Present
Universite de Technologie de Troyes (UTT) — Troyes, France

Exchange Semester, Innovation & Entrepreneurship — Feb. 2025 – July 2025
UTSEUS | Shanghai University — Shanghai, China

Baccalaureat with Honors (Mention Bien) + American Dual Diploma — Present – June 2023
Lycee Sophie Barat — Ile-de-France, France

Available for 6-month internship — September 2026 — National & international mobility — Driving license
