/Amorizz

## SKILLS

**Network & Infrastructure**

TCP/IP
Routing & Switching (OSPF, VLAN, STP)
Linux Administration (Debian, Ubuntu)
Cisco Packet Tracer
Wireshark
DNS, DHCP, HTTP/S, SSH
MPLS
BGP

**Cybersecurity**

Penetration Testing Fundamentals
OSINT
Kali Linux, Metasploit, Burp Suite, Nmap

**Development & DevOps**

Python
TypeScript / JavaScript (Basic)
Next.js / React (Basic)
PostgreSQL / SQL
Git, CI/CD, Vercel
Java
Docker
Kubernetes

## LANGUAGES

| | |
|---|---|
| French | Native |
| English | Fluent (C1) |
| Spanish | Intermediate (B1) |
| Chinese | Basic (A2) |

## CERTIFICATIONS

**CCNA (Cisco Certified Network Associate)**
Cisco | In Progress

**American Dual Diploma**
Dual Diploma Program | Obtained

**Baccalaureat Mention Bien**
Lycee Sophie Barat | Obtained

**Linguaskill, C1 and above**
Cambridge | Obtained

**Driving License (Permis B)**
Prefecture | Obtained

## INTERESTS

Music: drums (conservatory), guitar, piano

Sports: tennis (15 years competitive, ranked 15/4), weight training

## PROFILE

Incoming 4th-year engineering student at UTT in Networks & Telecommunications. Passionate about entrepreneurship and new technologies. Enjoys designing and building end-to-end solutions. Seeking a 6-month internship for summer 2026 to develop skills in infrastructure, development, and deployment.

## EXPERIENCE

**Founder** — Dec 2025 – Present
**Novad**

City recommendation SaaS platform matching user profiles to **300+** destinations using **vector-based** scoring.

- Designed and deployed a full-stack SaaS platform end-to-end: database schema, API layer, frontend, and production infrastructure (Next.js, PostgreSQL, Vercel)
- Implemented a vector-based recommendation engine scoring 300+ cities against user profiles using Euclidean distance computation
- Built a programmatic SEO engine generating 700+ structured content pages (city guides, country directories, data-driven rankings)

`Next.js · TypeScript · PostgreSQL · Vercel · SEO`

**Worker Internship** — Jun 2024 – Jul 2024
**Robert-Paysage**

On-site team operations under tight deadlines. Awarded internship bonus for quality and reliability of work.

## EDUCATION

**Engineering Degree, Networks & Telecommunications (in progress)** — Sep 2023 – Present
**Universite de Technologie de Troyes (UTT) | Troyes, France**

**Exchange Semester, Innovation & Entrepreneurship** — Feb 2025 – Jul 2025
**UTSEUS | Shanghai University | Shanghai, China**

**Baccalaureat with Honors (Mention Bien) + American Dual Diploma** — Jun 2023
**Lycee Sophie Barat | Ile-de-France, France**

## PROJECTS

**Archive Server & Virtual Shell** | Developer — Sep 2024 – Jan 2025

Implemented a **TCP**-based archive server handling LIST, GET, and PUT commands with sequential request queuing and operation logging via **netcat**. Developed a virtual shell client (vsh) enabling interactive archive navigation without extraction: ls, cd, cat, mkdir, rm with full path resolution. Designed a custom archive format with header-based metadata indexing for efficient random access to file contents.

`Bash · Netcat · TCP · Linux · Shell Scripting · Client-Server`

**Translate Project** | Developer — Jan 2025 – Mar 2025

Architected a multi-service pipeline with **FastAPI** backend exposing REST endpoints and **Streamlit** frontend for file management. Integrated three ML models in a single workflow: **Whisper** (speech-to-text), **M2M100** (EN→FR translation), and **Mistral 7B** (subtitle refinement via **llama.cpp**). Built subtitle post-processing module for SRT cleanup, segment splitting, and AI-enhanced phrasing.

`Python · FastAPI · Whisper · M2M100 · Mistral 7B · PyTorch`

**Pocket Imperium** | Developer — Apr 2024 – Jun 2024

Developed a multiplayer strategy game engine in **Java** supporting 2-4 concurrent players with simultaneous command processing, state management, and a dual-interface system (**Swing** GUI + console). Implemented game logic for fleet movement, territory control, and combat resolution.

`Java · Swing/AWT · OOP · State Management`

**Play Tennis Everywhere** | CTO & Co-founder — Aug 2025 – Present

MVP in active development. Designing a real-time player matching platform with **PostgreSQL** database, **Supabase** backend (auth, storage, real-time subscriptions), and automated deployment via Vercel. Multi-criteria matching algorithm based on skill level, geolocation, and availability.

`Next.js · TypeScript · Supabase · PostgreSQL · Vercel`

**Tiny Habits** | Co-creator & Pitcher — Apr 2025 – Jun 2025

Built a finance tracking app with **drag-and-drop** dashboard, per-category budget tracking, and **OpenAI**-powered transaction auto-categorization. Awarded **Best Public Speaking** and **Outstanding Business Potential** at Shanghai University.

`Next.js · TypeScript · Tailwind CSS · shadcn/ui · OpenAI API`

Available for internship | Summer 2026 | National & international mobility | Driving license
