SKILLS

- Network & Infrastructure**
TCP/IP, DNS, DHCP, MPLS, BGP, Routing & Switching (OSPF, VLAN, STP), Linux Administration (Debian, Ubuntu), Wireshark, Cisco Packet Tracer
- Cybersecurity**
Penetration Testing Fundamentals, OSINT, Kali Linux, Metasploit, Burp Suite, Nmap
- Development & DevOps**
Python, Java, JavaScript, Next.js, Docker, Kubernetes, PostgreSQL / SQL, Git, CI/CD, Vercel

LANGUAGES

French	Native
English	Fluent (C1)
Spanish	Intermediate (B1)
Chinese	Basic (A2)

CERTIFICATIONS

- CNNA (Cisco Certified Network Associate)**
Cisco — In Progress
- American Dual Diploma**
Dual Diploma Program — Obtained
- Linguaskill, C1 and above**
Cambridge — Obtained
- Driving License (Permis B)**
Prefecture — Obtained

INTERESTS

Music: drums (conservatory), guitar, piano
Sports: tennis (15 years competitive, ranked 15/4), weight training
Entrepreneurship
Travel & cultural discovery

Amaury Dufrenot

Networks & Telecommunications Engineering Student

PROFILE

Networks & Telecom engineering student at UTT. Founded and shipped a SaaS platform in production (900+ users, 3k daily impressions). Hands-on with Linux, TCP/IP, Docker, Python, and cybersecurity tools. Seeking a 6-month infrastructure internship starting summer 2026.

EXPERIENCE

- Founder** Dec. 2025 – Present
Novad
City recommendation SaaS platform matching user profiles to 300+ destinations using vector-based scoring.
- Shipped a full-stack SaaS platform from idea to production, reaching 900+ users and ~5 signups/day within 2 months (Next.js, PostgreSQL, Vercel)
 - Built a vector-based recommendation engine scoring 300+ cities against user profiles using Euclidean distance computation
 - Grew organic traffic to 3,000+ daily impressions through a programmatic SEO engine generating 700+ structured content pages
- Next.js · TypeScript · PostgreSQL · Vercel · SEO
- Worker Internship** June 2024 – July 2024
Robert-Paysage
On-site team operations under tight deadlines. Awarded internship bonus for quality and reliability of work.

PROJECTS

- Archive Server & Virtual Shell** — Developer Sept. 2024 – Jan. 2025
Implemented a TCP-based archive server handling LIST, GET, and PUT commands with sequential request queuing and operation logging via netcat. Developed a virtual shell client (vsh) enabling interactive archive navigation without extraction: ls, cd, cat, mkdir, rm with full path resolution. Designed a custom archive format with header-based metadata indexing for efficient random access to file contents.
- Bash · Netcat · TCP · Linux · Shell Scripting · Client-Server
- Mini Green Datacenter** — Infra Architect Jan. 2026 – Jan. 2026
Designed a hybrid eco-friendly hosting architecture during CRUNCH hackathon (UTT, 3 days). Segmented network infrastructure (WAN/DMZ/LAN) with Cisco firewall, secured VPN to external provider, reverse proxy and DNS. Deployed containerized web services (Docker/LXC) on Dell R710 server and Raspberry Pi, with energy consumption measurement and comparison via smart plugs.
- Docker · LXC · Cisco · VPN · DNS · Reverse Proxy · Raspberry Pi · Linux
- Hackable Security Labs** — Developer Sept. 2025 – Dec. 2025
Built isolated penetration testing environments using OpenVPN with full PKI certificate management (CA setup, certificate generation and distribution). Configured secure tunnel infrastructure with importable Docker images for reproducible lab deployment. Used for hands-on security training scenarios including network reconnaissance and vulnerability testing.
- OpenVPN · PKI · Docker · Linux · Bash · Kali Linux
- Play Tennis Everywhere** — CTO & Co-founder Aug. 2025 – Present
MVP in active development. Designing a real-time player matching platform with PostgreSQL database, Supabase backend (auth, storage, real-time subscriptions), and automated deployment via Vercel. Multi-criteria matching algorithm based on skill level, geolocation, and availability.
- Next.js · TypeScript · Supabase · PostgreSQL · Vercel
- Tiny Habits** — Co-creator & Pitcher Apr. 2025 – June 2025
Built a finance tracking app with drag-and-drop dashboard, per-category budget tracking, and OpenAI-powered transaction auto-categorization. Pitched to 50+ participants at Shanghai University and awarded Best Public Speaking and Outstanding Business Potential.
- Next.js · TypeScript · Tailwind CSS · shadcn/ui · OpenAI API

EDUCATION

- Engineering Degree, Networks & Telecommunications (in progress)** Sept. 2023 – Present
Universite de Technologie de Troyes (UTT) — Troyes, France
- Exchange Semester, Innovation & Entrepreneurship** Feb. 2025 – July 2025
UTSEUS | Shanghai University — Shanghai, China
- Baccalaureat with Honors (Mention Bien) + American Dual Diploma** Present – June 2023
Lycee Sophie Barat — Ile-de-France, France
